EDUCATION

● **Maharaja Institute of Technology Thandavpura**
Bachelor of Engineering in Computer Science And Engineering; CGPA: 6.3

Mysore, IN
Aug 2016 - Oct 2020

EXPERIENCE

● **Classic Informatics Pvt. Ltd.**
Software Engineer

Gurugram, IN
Nov 2021 - Present

- ❖ Web developer with expertise working with the **React.js, Redux, Node.js, Express.js, MongoDB, PostgreSQL, Firebase, Next.js, Typescript and JavaScript.**
- ❖ Experience in building REST API's for back-end.
- ❖ Designed the web application back-end using node.js and Typescript.
- ❖ Built web scraper API using Diff-bot tool.
- ❖ Experience in Agile methodologies.
- ❖ Experience in Server Tools like **GIT, JIRA, Bit-bucket**

Lead-gen Automation

○ *Software Engineer*

July 2022 - Present

Project Brief :-

The main objective of this project is to save time and efforts of the team for generating campaigns, leads and handling those as well by making the process automatic. Which will help increase the sales process and get to profitable customers in no time.

Roles And Responsibilities :-

- ❖ I have worked on this project as Back-end developer.
- ❖ Analyze the requirements of the functionalities.
- ❖ Using Typescripts complete API's endpoints are developed.
- ❖ Develop multiple REST API's endpoints for multiple different functionalities.
- ❖ Developed authorized routes for running API's endpoints in cron job.
- ❖ Built web scraper API endpoints to scrape data from different job postings (i.e. Linked-In, Indeed, seek-aus, angel.co etc) platforms.
- ❖ And the scrape data had been stored in the fire-store.
- ❖ Test and fix bugs in the application.

Time-Sheet Automation

○ *Software Engineer*

July 2022 - Dec 2022

Project Brief :-

The Time Sheet automation is an internal tool which is a complete set of projects management & time-sheet generator that will be used and managed by the management department of the organization. The project is all about complete time management of projects and hours logged by the employees for the particular project.

Roles And Responsibilities :-

- ❖ I have worked on this project as Back-end developer.
- ❖ Analyze the requirements of the functionalities.
- ❖ Using Typescripts complete API's endpoints are developed.
- ❖ Develop multiple REST API's endpoints for multiple different functionalities.
- ❖ By these endpoints completely automated the manual updation of data of particular employee to our DB.
- ❖ Test and integrate REST APIs endpoints.
- ❖ Test and fix bugs in the application.

Zonka feedback Product

○ *Software Engineer*

Dec 2021 - Feb 2022

- ❖ **Build a Dispatch Module:** Built a Dispatch Module which allows the user can assign a set of questions to the user of their field device to gather responses based on their visit to a location.
- ❖ **Implement features:** Implement the features sidebar for the inbox of responses on the app side. And also implemented SMS survey records on the admin side. Additionally developed REST API for SMS survey logs.
- ❖ **Test and Integrate:** REST API endpoints on **Redux saga** should be tested and integrated with the websites.

TECHNICAL SKILLS

- **Experienced Software Developer** with excellent knowledge of React.js, Redux, JavaScript and Typescript.
- **Hands on Experienced** in developing applications with React.js, JavaScript, Express.js, MongoDB, UI library (antd, material UI, tailwind css, styled components, etc.), Firebase, PostgreSQL, Next.js .
- **Design and develop web components** and its functionality as per design on Figma.
- **Hands on Experience** in designing web application UI using UI Library (antd, material UI, tailwind css, styled components, etc.) .
- **Hands on Experience** in developing REST API's for multiple functionalities.

ROLES AND RESPONSIBILITIES

- **Design, develop, implement and maintain React web application.** Implementing React App with Root component and React third-party components which includes Router management, React advanced state management (Redux).
- **Developing the screen** with multiple functionalities in React.js.
- **Developed the REST API's** for multiple functionalities in back-end using Typescript.
- **Fixing the defects** communicated by the testing team.
- **Done manual testing** of the application that developed. Attending daily stand-up meetings, configuring application properties, Sharing code with teammates using Git Git-bash .

HONORS AND AWARDS

- Participated in Blind Coding in Inter College Competition in 2018.
- Participated in Many Inter College Competitions. Participated in many coding competitions.
- Participated in Machine Learning Workshop held in our College. Organized many departmental events and functions.
